To whom it may concern,

As a recent graduate of DigitalCrafts Software Development Bootcamp (January 2023), I am eager to begin my career in the field and am currently looking for a position as a Web Developer/Software Engineer. I am continuously learning new technologies and am a solutions-driven, self-motivated web developer. I seek opportunities to contribute my problem solving skills and creativity to collaborative work environments in order to produce high-quality work.

I am an experienced educator with 9 years of knowledge in educational development, curriculum design, and project management. As an accomplished problem solver, I have the ability to identify client and organizational needs while managing several competitive projects and coordinating events. I gravitate toward ambitious goals, competition, and a great challenge. All of my projects consistently received the highest recognition possible for 8 years. I am a natural leader known for excellent verbal and written communication skills, strong interpersonal skills, and an avid public speaker.

I look forward to speaking with you more about the position, and sincerely appreciate your time and consideration.

Best regards,

**Robert Hackett**
